PROFILE

Highly motivated and enthusiastic Software Engineering undergraduate student who is seeking to find the opportunity to work in a challenging working environment that will encourage her to improve and learn new and necessary skills by the company to do her best for the sake of helping herself and the company.

EDUCATION

BSC (HONS) in Software Engineering - NSBM Green University (2023 - Present)

Certificate Course in English Language (CCEL) - IHRA – Colombo University (2023)

GCE Advanced Level (A/L) Examination - (Art Stream - 2020 – 2022(23)) Dharmapala Vidyalaya, Pannipitiya

CERTIFICATES & PARTICIPATIONS

Open Learning Platform – UoM

Python for Beginners Certificate, Python Programming Certificate, Web Design for Beginners Certificate, Front-End Web Development Certificate

PARTICIPATIONS

Kathika'24 Organized by Business Law Society of NSBM Green University, IEEEExtreme Programming Competition 19.

PROJECTS

ACADEMIA – Online Learning Platform - React, Modular CSS

Built a responsive e-learning website using React and React Router, featuring course listings, instructor profiles, pricing plans, and a blog. Used functional components, React hooks, and modular CSS to create reusable components and interactive UI elements.

Admin Dashboard — React.js, Vite, Recharts, FontAwesome, CSS3

Built a fully responsive Admin Dashboard SPA using React.js and Vite, featuring a collapsible sidebar navigation, interactive data visualizations (Bar and Area charts) via Recharts, a paginated sales table, and dynamic widgets including a real-time To-Do List, Calendar, and Messages panel — all optimized across mobile, tablet, and desktop breakpoints.

Diabetes Prediction System - Python, Scikit-learn, Streamlit

Python, Scikit-learn, Streamlit Built an AI-powered web app that predicts diabetes risk using an SVM model with ~78% accuracy. Implemented data preprocessing, feature scaling, and an interactive UI with real-time risk assessment and health recommendations.

Movie Rating Prediction System - Python, Streamlit and Pandas.

Built an end-to-end machine learning application that fetches real-time movie data from the TMDB API and predicts movie ratings using XGBoost. Implemented NLP-based synopsis encoding with Sentence Transformers and deployed the model as an interactive web app using Streamlit.

FERROX CONCRETEX - HTML, CSS, JavaScript

Designed and developed a fully responsive multi-section commercial website featuring a dark industrial UI, CSS animations, client-side form validation, filterable card system, and mobile-responsive navigation — structured across separate HTML, CSS, and JS files.

TECHNICAL & SOFT SKILLS

Technical Skills:

Programming Languages: JavaScript, Dart, HTML & CSS, C, SQL, Python

Frameworks & Libraries: React js, Node js, Next.js, TailwindCSS

Tools & Technologies Version Controllers: Git/ GitHub, VS Code, Android Studio, NetBeans, MS SQL Server, Jupyter Notebook

Machine Learning: Data preprocessing, model training & evaluation (Scikit-learn)

Soft Skills:

Root course analysis, Attention to Detail, Problem-Solving, Communication, Teamwork & Collaboration, Adaptability, Time Management, Presentation and Documentation skills.

VOLUNTEERING

Arduino Community Sri Lanka - Community Volunteer (Arduino Day 2025)

Mathematics and Statistics Circle - Student Volunteer (Maths Master)

IEEE Student Branch - Student Volunteer (Duothon 5.0)

Hackathon Hub - Student Volunteer (Plymhack)
